Juan Pablo Pérez Vélez — selected CV

Prepared 6 November 2026 · Juan Pablo Pérez Vélez

Profile

Juan Pablo Pérez Vélez
Software developer · Chemical Engineering undergraduate
Medellín, Colombia · contact@pdevelop.net
https://pdevelop.net · https://github.com/juapperez

Education

Universidad Nacional de Colombia, Medellín — currently enrolled as a Chemical Engineering undergraduate. Applying for independent project support, not on the university's behalf. No completed degree or academic research appointment is represented.

Open-source work

CheckBridge — November 2026 experimental numerical checker: three fixed cases, eleven passing local tests, an experimental MCP stdio adapter, MIT code. Live-model evaluation and independent review remain proposed.
https://github.com/juapperez/checkbridge

expo-alphatab — MIT Expo/React Native score-rendering wrapper; package 0.1.0, seven passing tests and an existing iOS integration in Fretbox. Android integration and external adoption are not verified.
https://github.com/juapperez/expo-alphatab

Selected shipped software

Fretbox — iOS guitar-learning app with score-rendering integration; initial App Store release September 2026, version 1.0.2 verified November 2026.
Canta — iOS singing-learning app with on-device audio processing; version 1.0.4 verified October 2026.
Riffuno — iOS language-learning app using hosted language-model services; version 1.0.2 verified November 2026.
These are existing software projects; their assets are not offered for relicensing under the proposed research grant.

Demonstrated areas of work

React Native/Expo, TypeScript/JavaScript, automated local testing, numerical fixtures, mobile software delivery and open-source documentation. This is a selected project CV, not an exhaustive employment history. No peer-reviewed AI-safety publication or measured model-evaluation result is claimed. AI tools assisted the new prototype, tests and application materials.
